ASSISTANT PROFESSOR IN DIVERSITY SCIENCE - TEXAS A&M UNIVERSITY. As part of the continued initiative to build on existing research in diversity science across areas in psychology, the Department of Psychology (http://psychology.tamu.edu) at Texas A&M University invites applications for a tenure-track faculty position at the assistant professor level with research interests in diversity science, broadly construed, to begin Fall 2016. Thus, the Department seeks candidates with research interests in topic domains such as (but not limited to), the intersection of individual, team, group, organizational, and community factors with diversity factors such as race and ethnicity, age, sex and gender, religion, language, national origin, and culture, amongst others. This focus might include the creation, interpretation, and maintenance of group differences among individuals; the micro (individual, psychological), and macro (team, group, organizational, societal) consequences of group and subgroup distinctions and differences (real or otherwise); stereotype threat, test score differences, and the achievement gap; representation in STEM, and various other implications for cognitive, social, and organizational science. Candidates with strong quantitative skills are encouraged to apply. Successful applicants should have a strong record of research achievement (or potential) and evidence of, or demonstrated potential for, external funding. All candidates should have a strong commitment to undergraduate and graduate education; an interest and ability to teach graduate-level statistics courses would be considered to be an advantage. Successful applicants should be able to contribute to one or more existing departmental doctoral training areas (i.e., Behavioral and Cellular Neuroscience, Clinical, Cognitive, Developmental, Industrial/Organizational, and Social). A doctorate in psychology or a related field is required. Inquiries from prospective applicants may be directed to Winfred Arthur (diversityscience@tamu.edu). For further information about faculty with interests in diversity science within the Psychology Department, and other relevant resources at Texas A&M, see [http://psychology.tamu.edu/html/diversity-science.html]. Applicants should submit to Dr. Winfred Arthur (diversityscience@tamu.edu): a cover letter, curriculum vitae, statement of research, teaching, and service, and a list of three references including contact information. In the cover letter, we request that applicants address how their research in diversity science informs their approaches to teaching, service, and mentoring. Full consideration will be given to applications received by October 15, 2015. Applications received after that date may be considered until positions are filled. The Texas A&M University System is an Equal Opportunity Employer has a policy of being responsive to the needs of dual-career couples.
